## Wiring Diagram

**IMPORTANT:** Incorrect wiring connections can damage the unit. Follow the wiring instructions carefully, or have the installation handled by an experienced technician.  
For basic iPod® connectivity you can use the white 30 pin to USB iPod® cable that came with your Apple device. For iPod® video or photo playback, you must purchase the JLivik USB cable. Connect the iPod® cable to the rear chassis iPod® inputs (USB / 3.5mm connectors) and route the iPod® cable to an accessible part of the dash area for easy connectivity. For occasional iPod® use, keep an iPod® cable in your glove box and use it to connect the iPod® to the front USB connector.
